

FESTIVAL

Sales Presentation

Highlights

- Festival can offer a wide selection of products – particularly fresh food – to a high standard around the clock:
 - A simple design for a true automatic canteen
 - Flexible: able to dispense a wide range of products including plated meals, fresh fruit and packaged drinks
 - Each drum can be set to a time zone, to reserve products for specific times or shift patterns
 - An appealing and contemporary user interface
 - Advanced features for managing the machine
 - High reliability and easy maintenance

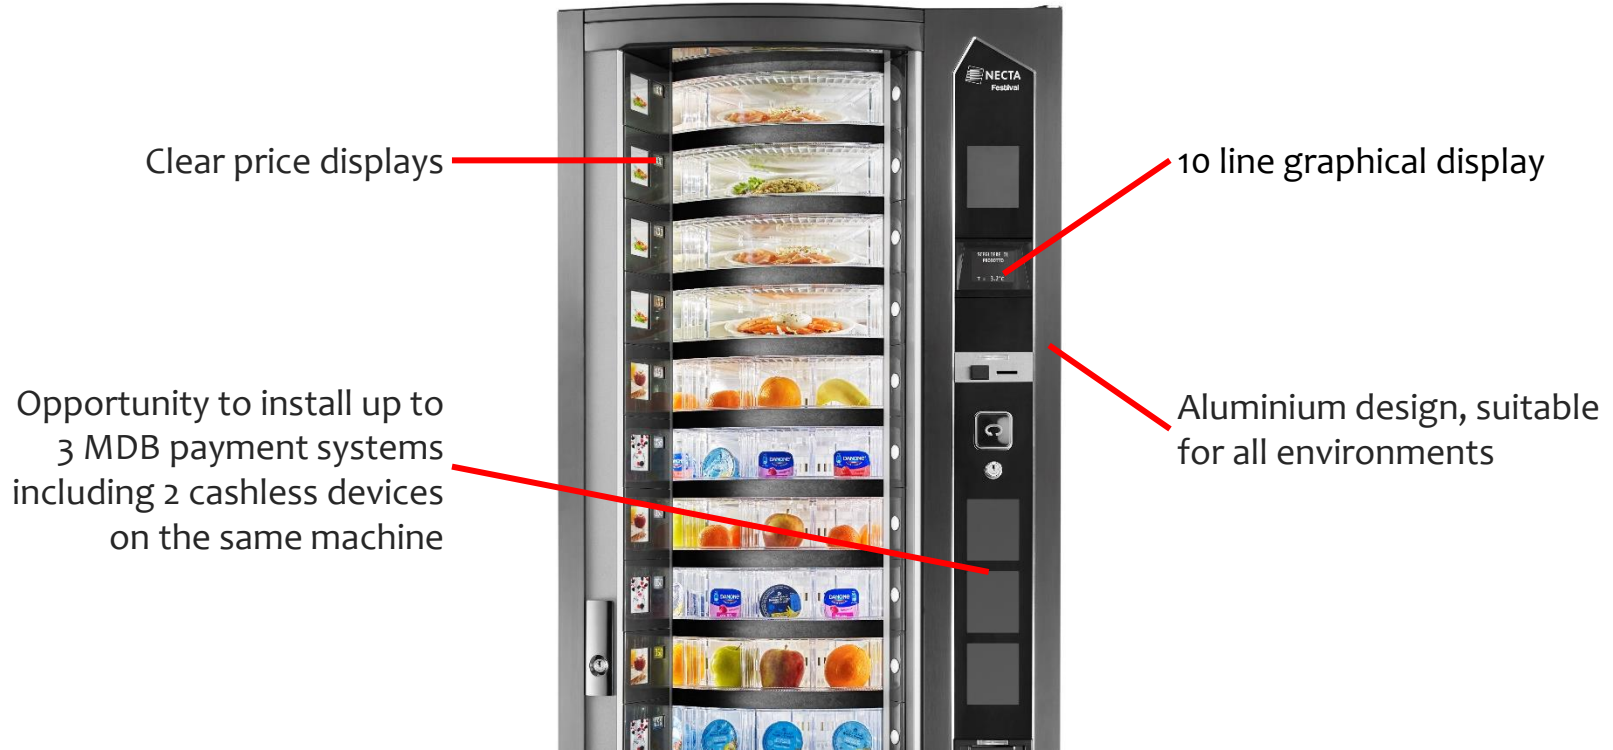

Design

- LED lit front panel for a cleaner appearance
- User friendly features include backlit shopper button and clear pricing screens
- Flashing LED light path guides the user to the next step (insert cash/card, make selection, take product, take change)
- Updated aesthetics allow the Festival to sit uniformly alongside any other products in the NECTA family

User Interface

Specification

- Products are housed in 8 or 10 rotating drums
- Each drum contains between 6 and 36 segments
- Each segment has a depth of 280mm
- There is the flexibility to offer small snacks and plated meals (plate diameter: up to 225mm)
- Up to 40 different prices
- The temperature layout can be set according to the requirements of the site or location

Operating & Maintenance

- Festival is easy to operate thanks to some simple and useful features:
 - Each drum is loaded one product at a time through the delivery area with the door closed, maintaining temperature stability and saving time and energy
 - The size of each compartment in each drum can be quickly modified so products can be changed according to customer requirements
 - The machine will still operate if one or more drums have been removed, either for cleaning or repair
 - The flat surfaces of the user interface are easy to clean
 - The cooling unit is an easy slide-in / slide-out module
 - The software menu is simple; making engineer visits quicker and easier
