

MAESTRO TOUCH

Product Presentation

Maestro Touch

- Elegant design: Maestro Touch leads the way in high-end hot drinks vending
 - The latest technology and operational efficiency:
 - Powerful software platform
 - Streamlined internal layout and synergy across the Necta range
 - Unlimited selections and drinks that meet consumer expectations
 - Cloud-based, two-way connectivity for remote control of the machine
 - The best consumer experience:
 - Intuitive to use
 - Delivers cutting-edge performance across a wide choice of drinks, and gives consumers the ability to customise their drink
 - Entertains and/or informs consumers while waiting for their drink

Highlights

- Completely revamped electronics and advanced software for easy machine management and for personalising the graphics
- A flexible and dynamic user interface incorporates the digital technology that features widely in the rest of our day to day lives, including an attractive 24” full HD touchscreen with speakers
- Future proofed with in-built, two-way connectivity
- Pairs elegantly with Necta’s Orchestra snack machine
- Fits neatly into many different environments

Operational Efficiencies

- Coffee brewer
 - 14.5g coffee capacity – only one shot needed to create 12oz drinks
- Tea brewer
 - Uses 40% less tea to make the drink, saving costs on ingredients
- Software
 - Significant advances in functionality compared with Canto and other Necta hot drinks machines
- Ultimate flexibility
 - Create unlimited drink variants and selections
 - Intuitive software makes this simple to achieve

Modern & Attractive Design

- Black door, dark grey cabinet with frameless touch-screen
- Door profiles in anodised aluminium with diamond effect incision
- Wide delivery area
- Perfect match with Orchestra range

Software Platform

- Standardised across the Evoca range, reducing operating costs
 - Smart phone-style interface
 - Program the machine on a laptop and upload via USB
 - Quick and easy to use, including Drag & Drop function
 - Quicker machine diagnosis / maintenance
 - Training efficiencies - familiarity across the Evoca range

Customisable Graphics

- Tailor the Graphical User Interface (GUI) using our simple tool
- Customise in-built graphics or develop your own
- Create menus, promotions and upselling, or host multi media content
- Differentiate yourself from competitors and create brand awareness

Multiple End User Benefits

- Familiar purchase experience – like using a smartphone
- Extensive drinks menu
 - Possible to create own customised drink
 - Quick selection: “my favourite”
- Easily navigate product categories
- Consult nutritional values
- Play games or watch video during drink preparation

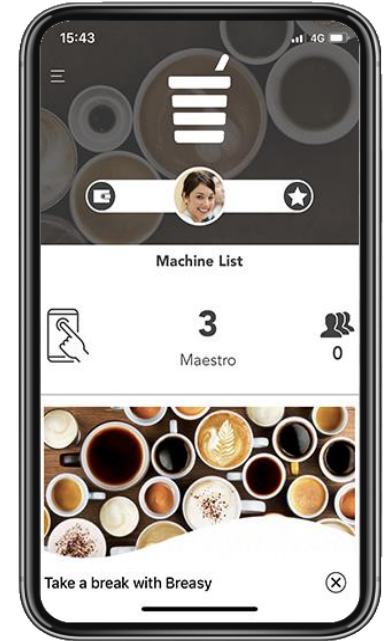

Touchscreen: Improved User Experience

- Maestro Touch features a fast and reactive, full HD touchscreen, which enhances the overall consumer experience
- This dynamic and appealing user interface improves consumer interaction, engagement and entertainment
 - Play high resolution videos for promotion or entertainment
 - Display nutritional information to help consumers to make lifestyle choices
 - Communicate promotional offers for easy & effective upselling
- High brightness, with perfect visibility and guaranteed screen life

Future-Proof: Breasy*

- In app selection:
 - End users can immediately connect to the vending machine via Bluetooth and purchase their selection
- Advertising Banner:
 - Operators communicate directly with consumers via the in-app banner
 - Operators improve their customer purchasing experience, by customising their banner with promotions or important messages
- Customised loyalty programs :
 - End users receive push notifications that inform them about promotions
 - End users get cashback directly into their e-wallets

* Coming Soon

Future-Proof: AmiClo*

- AmiClo is a cloud platform to manage specific machine features remotely:
 - Playlists
 - Product recipes can be easily adjusted
 - Software upgrades, with on field activation needed
 - Re-boot machines and reset errors
 - Full management of the configuration and complete backup of machines equipped with new electronics

AmiClo
powered by Televent

* Due 2022

Why Create a Bank of Machines?

- Bank with Orchestra impulse machines
- Wide choice of hot drinks, combined with snacks or cold drinks
- Greater chance to satisfy users' needs
- Increase sales through promotions and effective upselling

Wherever You Want
